Air Conditioning & Drinking Water

The apartment is equipped with a state of the are silent air conditioning unit which in winter also heats the apartment with energy efficient heat pump activation. The main operation actions are shown below.

The apartments are equipped with an activated carbon filter to provide always clean drinking water from the tap.

When **the LED is continuous red** on start and stopping the water flow, there is about 50 litre of capacity left. Please inform us, so we can change the activated carbon filter.
