### Parking

The CityOasis is in the middle of Girona old town so you can access all the bars, restaurants, shops and entertainment easily on foot. However, with regard to parking your car, the following information will be helpful:

Please be aware that parking in the open means that there is no supervision and there are only few camera surveillance systems in place. So, make sure you have no valuables in the car and that the car is locked and the alarm is activated.

### Line markings on the streets – Girona Municipality is unforgiving

If your car is towed away, the police will stick a label on the road with all the information. We are glad to help in such unfortunate circumstances.

 You should not park when there is a **red line painted on the road**. You will stand a very good chance that your car is towed away.

 If there is a **yellow line painted on the road** this is a loading zone and private cars are not allowed to stop there at certain hours. Normally it is 9:00 to 19:00 Monday to Saturdays. The hours are displayed in on traffic signs. If you park your car without anybody being there and it is within the restricted hours you also stand a good chance that your car is towed away.

If there is a blue or green line on the road you need to find the ticket machine, buy a ticket and  display it in your car. The parking is normally free during night hours and over lunchtime. You will find the information on the ticket machine, whereas most of them have multilanguage instructions.

If you want spacious parking and continuous personnel present, we recommend the SABA underground parking, which has also 2 electric car charging places. It is 8 minutes' walk from the City Oasis. You can get long term parking special prices, please contact them.

The details are:

#### Parking Saba

Carrer de Berenguer Carnicer

17001 Girona
